Present
Since Aug '13

Supervisor, Web Development
eBay Enterprise

Actively engaged in a leadership role in many different functions, including, but not limited to: scoping new project requests, pitching technology to new and existing clients, mentoring and coaching a team of developers in bi-coastal locations, and recommending different and innovative ways of implementing technology.

2013
Since Dec '11

Web Developer
True Action, an eBay Inc. Company

Mastered coding under pressure, with tight deadlines. Projects included a wide-range of clients on a massive e-commerce platform. Clients include PetSmart, Toys 'R Us, Dollar General, Levi's, Docker's, and many others.

Present
Since '06

Freelance Web Developer
derrickshowers.com

Excited, energetic, and eager to learn new technologies that enable the building of robust websites and web applications.

A full stack developer - exposure to all aspects of a project, ranging from the client relationship itself to creative/design and sever administration.

Who Am I?

A web developer who is passionate about all aspects of technology, quick-learning, works great on a team and never afraid to learn or try something new.
